

CHAPIN ONCE MORE

Re-Elected Mayor of Brooklyn by a Handsome Majority.

General Jubilations Among Democrats Over the Bridge.

District Attorney Ridgway Proves His Popularity.

There is general jubilation in the Brooklyn Democratic ranks this morning over the sweeping victory of yesterday, in which they carried all before them.

Early in the evening the Republicans conceded the re-election of Mayor Chapin, and as the returns came in showing increased Democratic gains their spirits sank in proportion to the jubilation of their victorious opponents.

Mayor Chapin's house was besieged with friends this morning, all eager to congratulate him on his victory.

ABBEY'S 8,000 MAJORITY.

Jersey Democrats Elect their Governor and a Majority of the Assembly.

The supporters of ex-Gov. Leon Abbott are fully satisfied with the result of the balloting in that State. Their candidate is elected by a majority which is decisive, though not quite up to their expectations.

Gov. Abbott's majority over Gen. E. Burr Grubb is about 8,000 votes. The Democrats

have chosen 36 Assemblymen to the Republican caucus, but the latter have the Senate by 11 to 10.

Jersey City's independent movement did not materialize as expected. Essex administered a rebuke to Senator Sewell by giving Abbott half a thousand majority and defeating the Republican county ticket.

There were complaints by leaders of both parties of the two of the election, and the returns came in slowly. The results in the State are given below by counties.

LOVE SIGNALS FROM THE CAR.

How a Western Engineer Let's His Girl Know He Is Near.

The many passengers who go and come from Omaha on Nos. 3 and 4, Burlington and Missouri trains, says the Omaha World-Herald, have undoubtedly wondered why the engine whistles so often and long when nearing the crossing near Fort. Two of the passengers were recently shown the cause of so much whistle.

The engineer, J. G. Roberts, has a pretty country girl admirer who lives near the road and who never fails to be at the track, rain or shine, daylight or dark.

To the sign of the girl awaits the coming of the train, notice of which is given her long before it could be seen, and she, with lantern in hand, stands and waves the light until it comes up to her and passes. Then she turns quietly around as if she had performed a duty and waits back to the little farm-house, perhaps contented, while the faithful and time-tried engineer pilots the heavily loaded train to its destination.

Some of the train men think Mr. Roberts and the girl will eventually stop this whistling and lantern signaling, and that she will await his coming at one end or the other of his run.
